

CRICKSTATS

1. Brainstorming & Ideation Phase

Problem Statement

- Player statistics may be maintained in different files, making it difficult to find complete information.
- Manual entry and calculation of statistics can take additional time.
- Coaches and team managers need an easier way to view player performance.
- Analysts need organized data for comparing player statistics and performance trends.

Target Users

- Team Managers
- Coaches
- Sports Analysts
- Salesforce Administrators

Brainstorming Ideas

- Web-based player management system
- Cricket statistics tracker
- Salesforce-based performance application
- Dashboard-based analytics
- Automated player statistics

Selected Idea

- The selected idea is a Salesforce-based cricket player performance tracking application named CRICKSTATS.
