

# CRICKSTATS

## 5. Project Development Phase

### Development Overview

- The development phase focuses on creating the Salesforce objects, fields, relationships, roll-up summary fields and Flow required for CRICKSTATS.

### Milestones

- Milestone 1 – Developer Account: Create the Salesforce Developer account and complete the initial account setup.
- Milestone 2 – Object Creation: Create the Player and Match Performance custom objects.
- Milestone 3 – Tabs: Create custom tabs for Players and Match Performances.
- Milestone 4 – Lightning App: Create the CRICKSTATS Lightning App and add the required navigation items.
- Milestone 5 – Fields & Relationships: Create fields required to store player and match information and establish the relationship between Player and Match Performance.
- Milestone 6 – Roll-up Summary: Create summary fields on the Player object to calculate match count, total runs, fours, sixes, overs, wickets, stumpings and catches.
- Milestone 7 – Flow: Create a Screen Flow that allows the user to select a team and view the related player information.
