

# CRICKSTATS

## 6. Project Testing Phase

### Functional & Performance Testing

- Player and Match Performance record creation was tested.
- Validation rule checks for mandatory fields, score limits, and input constraints were verified.
- Record type behavior for Domestic and International match categories was verified.
- Flow execution was tested for automatic updating of player statistics and data consistency.
- Roll-up summary fields were tested for accurate calculation of total runs, wickets, averages, and performance metrics.
- System performance was evaluated by monitoring response time during data entry, report generation, and dashboard loading.
- The application was tested under multiple user interactions to ensure stable performance without delays.
- Generated reports and interactive dashboards were documented to confirm accurate data visualization, real-time updates, and reliable performance tracking.

### Testing Result

- These testing activities ensured that the CRICKSTATS platform met both functional and performance requirements and was ready for deployment.
